

JTEKT

日本製
MADE IN JAPAN

JMAX-U1

**PREMIUM HEAVY DUTY
DIUREA BEARING GREASE**

Recommended for Wheel Bearing,
High temperature, Long Distance
Driving Application

4X LONGER LIFE

JTEKT JMAX-U1 is a premium quality Di-urea based grease manufactured to provide high performance for Automotive wheel bearings, and Industrial and other general application bearings.

Characteristics of JMAX-U1

Fretting Resistance

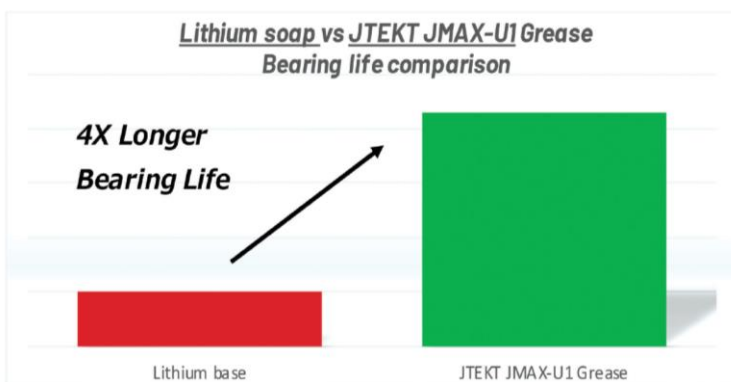

Superior in forming oil film which controls fretting wear process of rolling/sliding surface

Rust prevention

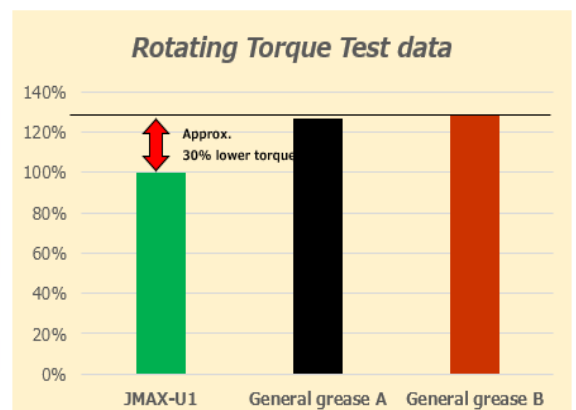

Provides exceptional rust prevention performance.

Heat resistance

Containing urea-based thickener, it excels in heat resistance, enabling application under severe operating conditions such as high temperature and high speed environment

*Results by 4 Balls Testing Method, JTEKT Internal data

Net Weight : 400gms & 5Kg
Operating Condition : -20°C - 170°C
Thickener : Urea
Base Oil : Mineral Oil
Color : White
